

# STANDING OVATION

## IS JOY FOR LIFE

*"Those who want solutions find ways,  
those who want to prevent them find excuses!"  
(Peter Lammer)*

**We SIT while we STAND!**  
The only solution in the world,  
that relieves the strain on your  
legs up to 100%, while both  
hands are free!

STANDING  
OVATION

# WHERE STANDING OVATION IS USED

## Inclusion / Participation:

Not attempted - implemented!

In many cases, limitations are compensated up to 100% at eye level. Retraining becomes unnecessary, self-determination and autonomy become a matter of course.

## Therapy / Rehabilitation:

No pain + no fear = fast success!

- Therapy can start EARLY (up to 100% relief for legs and feet)
- The patient immediately moves from the wheelchair to an upright posture
- 100% fall prevention thanks to different support systems
- Nerve stimulation and muscle building accelerate therapy effects or slow down disease progression
- Restrained posture and incorrect loading have no chance
- Expensive / high tech anti-gravity devices are not needed any more
- Alternative to water therapy
- Crutches and rollators are a thing of the past!
- YOUR HANDS ARE ALWAYS FREE!

## Sick leave costs:

The costs for employers for loss of productivity, continued payment of wages and compensation in the first 16 days amount to an average of € 5,520.

Over 20% of all sick days are caused by musculoskeletal disorders. 40% of all musculoskeletal disorders are work-related. Every 10th accident at work is related to physical strain.

## STATEMENTS

*"With Standing Ovation, we immediately get the patients out of the wheelchair and into a vertical position. From the start, they work with both hands in rehab."*

**Hans Baumgärtler**

Head of Occupational Therapy, BG Clinic Murnau

*"Standing Ovation is from an occupational health point of view, to be rated as the gold standard for stress-induced pain in the lower extremities."*

**Dr. med. Oliver Bernecker**

Chief Medical Officer, ÖBB

*"Standing Ovation has proven to be a safe system for use in therapy."*

*It has now established itself as an ideal addition to our range of therapies."*

**Prim. Dr. Burkhard Huber**

Medical Director at AUVA Rehabilitation centre Häring  
(Foto ©: AUVA)

*"I was impressed to test the innovative development of Standing Ovation myself. Solutions like these are key for the labour market in terms of inclusion, but also of great value for therapy and prevention."*

**Dr. Martin Kocher**

Federal Minister of Labour and Economics

Regular retirement age

Career continuity

Career advancement

Economic gain

**JOY OF LIFE**

**Autonomy and Self-determination**

### Developed for and with people affected.

Peter Lammer had a very serious accident that brought the father of four and restaurant owner to the brink of existence. The love for his children and the passion for his profession were the driving forces that led him and his friend Bernhard Tichy to the development of this unique solution.

Contrary to all medical predictions, he has been cooking pain-free in his kitchen every day since 2016. THANKS to **STANDING OVATION**, he is once again a part of society, a happy contributor and, above all, experiences **JOY OF LIFE**.
